(54) Title: DEVICE AND METHOD IN THE TRANSFER OF THE PAPER OR BOARD WEB IN THE PAPER OR BOARD MACHINE

09/424636

(57) Abstract

The invention concerns an equipment and a method in the transfer of a paper/board web in a paper or board machine. In an embodiment of the invention, the dryer section comprises at least one group of drying cylinders in which, instead of a conventional wire draw, a transfer belt (H<sub>100</sub>) is employed, to which the web (W) is affixed by effect of adhesion and which transfer belt is passed over drying cylinders (K<sub>1</sub>, K<sub>2</sub>, ...) and reversing rolls (E<sub>1</sub>, E<sub>2</sub>, ...) and further in said group (R<sub>1</sub>) of drying cylinders in the dryer section. The invention also concerns a method in the transfer of the web (W) in the dryer section (K) of a paper/board machine. In an embodiment of the invention, the web (W) is passed, while meandering in loop shape and while adhering to the face of the transfer belt (H<sub>100</sub>), from a drying cylinder (K<sub>1</sub>) in the group (R<sub>1</sub>) of drying cylinders in the dryer section (K) onto a reversing roll (E<sub>1</sub>) and further from the reversing roll onto the next drying cylinder (K<sub>2</sub>) and further in the group (R<sub>1</sub>) of drying cylinders.
